1. In general, when you hear the word "online teaching and learning", what comes first to your mind?
2. Based on your own background and experience, how would you define online teaching and learning?
3. What are the positive and the negative things about learning on line?

	Positive Things	**Negative Things**
Teacher		
Other students		
Classroom		
Technology		
Interaction		

4. Rank these topics with your partner. Put the best courses to learn online at the top. Change partners often and share your rankings.

- English
- Art
- Coding
- Chemistry

What subject do you think is the best to learn online? Write three reasons why. Also, write which is the worst of these to learn online (and why).

Assess your learning style: http://www.educationplanner.org/students/self-assessments/learning-styles-quiz.shtml

Sub-task 2: Develop/Create the eLearning activity with the chosen tool

You will present the final result (activity created) explaining:

- the way you have worked to design the activity
- the reason(s) you have chosen the specific tools
- what this activity is about and what the end-user (students) are asked to do

Insert description, link, and/or screenshot of final result here:
